11. In considering Remit 12 - Compensation for Shifting of Hives - it was agreed that no further action be taken meantime.

12. Considerable discussion took place concerning the provision of Apiary Inspection by the Ministry for the Association, during which Mr Reid indicated the following information:

a) The cost of providing the register and an inspection service was approximately \$200,000, costed approximately 50:50. There were 7500 registered beekeepers of which slightly less than 500 had 50+ hives, and a further 150 (excluding staff) were involved in the industry full time.

At best the Ministry achieved a 10% inspection rate, therefore leaving 90% unserved. The Ministry was, therefore, only providing an "insurance policy" and could not eradicate disease but only prevent it from spreading. However, the Minister had decreed that the provision and maintenance of the register is a requirement under the Apiaries Act and, therefore, is not a service.

Considerable discussion took place in respect of this matter, a decision being deferred until after the luncheon meeting with the Under-Secretary of Agriculture.

Adjournment:

The meeting adjourned at 11.45 a.m. to lunch with the Under-Secretary, Mr Ralph Maxwell, and re-convened at 1.19 p.m.

Following further general discussion it was agreed that the NBA Executive would prepare further submissions on the basis of a base fee for those beekeepers with up to 50 hives, and those with more than 50 hives, with the possibility of a sliding scale, with Government funding to a level of 50% of the cost, in recognition of the national benefit provided by the industry and the advised Ministerial comment (5 February 1987).

The President reported that he had responded to the Northland Branch correspondence on this matter.

FINANCE:

7. 1988 Hive Levy. Following the discussions with the Under-Secretary concerning the Ministry's dilatoriness, it was agreed that the Association would stand firm, and also that the Association would explore every avenue to make the Ministry accountable for its lack of action.

17. A request for funding from the DSIR Biotechnology Division relative to the combination of heat and time on aroma volatiles in honey - agreed that Dr Visser be advised that aroma is not a factor particularly in respect of exports.

18. The meeting was advised that there appeared to be nothing of obvious concern in the discussion papers related to environmental quangos and, therefore, there was no need for the Association to make any submissions.

19. The President reported that he will respond to the Under-Secretary's correspondence with G. Jeffrey of Mountain Beech Apiaries.

20. It was agreed that support be sought from the Kiwifruit Authority for the Association's submissions on disease control, after these have been forwarded to the Minister.
